Portfolio: diachok.com ↗

Lead product designer with 17 years in product and experience design and a background in architecture. I also work as Product Owner and prototype in code, so I carry products from user research through the backlog to launch. I lead a team of 12 designers and have recently designed AI features and complex data platforms for the World Economic Forum, and regulated onboarding for Lombard Odier and Santander.

Selected outcomes

World Economic Forum

Took the Industry Transformation Platform from research to launch

As designer and Product Owner, I used interview findings to cut planned AI features and focus the scope on the Improvement Engine. Across 12 usability sessions, clarity and task completion rate rose from 43% to 90%.

SimplyBook.me

Led the product that team.blue later acquired

I owned product and customer experience through its redesign into a market-leading booking platform, acquired by team.blue in 2023. It now serves 50,000+ businesses in 200+ countries.

Banking

Designed regulated onboarding for two banks

At Windmill Digital, I designed AML/KYC onboarding and document-signature flows for Lombard Odier and Santander.

Experience

2022 – now

Lead Experience Designer and Product Owner

Windmill Digital

- Lead a 12-person design team; 7 of them work with me on World Economic Forum initiatives: Forum Spaces, Lumina, MINDS+, Forum events and apps.
- Designed AI features across Forum products: assistant chats, AI-guided interactions, widgets and AI-first platforms, including a pattern that separates assessment data from AI interpretation.
- Owned the Industry Transformation Platform end to end: research, workshops, interviews, prototypes and usability tests, user stories and acceptance criteria, client communication and code contributions.
- Shipped the Global Lighthouse Network configuration (live September 2026), now the model for MINDS.
- Built token-based theming for the Forum's design system with Tokens Studio and custom tools.

2020 – 2022

Lead Experience Designer

EPAM Systems, for DAT Freight & Analytics

- Led 4 designers across DAT's freight products: Load Boards, DAT iQ analytics and the DAT OnTime fleet-tracking system.
- Owned UX for data-heavy logistics tools used daily by carriers, brokers and shippers.

2015 – 2020

Senior Product Designer

SimplyBook.me

- Owned product and customer experience for an online booking platform used by businesses worldwide.
- Made design decisions from data: ran continuous A/B tests and validated changes before rollout.
- Built and led the design function: hiring, mentoring, skill matrices, assessments and design critique.

2009 – 2015

Earlier roles

Qarea and Testfort, Hello Web Apps, EMP Studio

- UX/UI designer for web and mobile products, including work for Amazon, John Hancock and Safety 1st at Hello Web Apps.
- UI, gameplay, art and 3D models for a space-strategy game at EMP Studio.

Skills

Expertise	Design leadership, product ownership, AI product design, user research and usability testing, design systems and tokens, prototyping in code, workshop facilitation
